## Are you prepared for a flood?

In Autumn 2000 floods caused terrible damage to some 10,000 homes and businesses. One of them might have been yours.

Around two million homes and businesses are situated in flood plains in England and Wales and are at risk of flooding from rivers or the sea.

Flooding is a natural process that can happen suddenly. While the Environment Agency aims to provide advance warning and local authorities may provide assistance, the person who can do most to help is you.

You may have a burglar alarm and the chances are you know what to do in the event of a fire, but are you and your family prepared for a flood?

This Flood Directory contains practical information on the Agency's flood warning code system and how to protect yourself, your family and your home in the event of flooding. It also gives a list of useful telephone numbers and a map showing your local flood warning area. Please keep it somewhere safe.

# Who can help?

## Environment Agency

- responsible for flood defence and flood warning in England and Wales and issuing flood warnings to the public
- provides the **Floodline 0845 988 1188** service. You can listen to recorded flood warning information or speak to an operator for general information and advice 24 hours a day

## Local authorities

- work with the police, fire and rescue services and the Environment Agency in the response to severe flooding
- set up rest centres for people evacuated from their homes and arrange temporary accommodation
- deal with road closures caused by overflowing drains and sewers
- may be able to provide sandbags in some parts of the country, or check the Environment Agency website [www.environment-agency.gov.uk](http://www.environment-agency.gov.uk) for flood protection product retailers

## Police

- co-ordinate the emergency services in a major flood incident and help with evacuation of people from their homes where necessary

## Fire Service

- responsible primarily for saving life, rescue and recovery
- may also pump out floodwater (there may be a charge to householders for this service)

## Citizens Advice Bureaux

- may be able to offer advice on how to obtain money in an emergency and deal with insurance queries
- details of your local Bureau can be found in the phone book or on the CAB website [www.nacab.org.uk](http://www.nacab.org.uk)

# The Flood Warning Service – know your codes

In England and Wales the Environment Agency operates a flood warning service in areas at risk of flooding from rivers or the sea, and maintains and operates flood defences.

Using the latest available technology, Agency staff monitor rainfall, river levels and sea conditions 24 hours a day. We use this information to forecast the possibility of flooding from rivers and the sea using a set of four easily recognisable codes (*please see inside front cover*).

Each of the four codes indicate the level of danger associated with the warning. They are not always used in sequence; for example in the case of a flash flood a Severe Flood Warning may be issued immediately, with no other warning code before it.

The four codes show the risk of flooding from rivers or the sea. See map for areas where a full flood warning service operates. You may have seen them on TV weather bulletins together with the Floodline telephone number.

# Cambridgeshire including Peterborough directory – your local service

The Environment Agency uses the latest technology to monitor rainfall, river and sea levels 24 hours a day. The information is used to forecast flooding from rivers and the sea. Warnings of flooding are delivered by a combination of methods including direct telephone calls to properties in high-risk locations, local radio and TV and in some locations sirens.

For the most up to date information and advice on flooding call the Environment Agency **Floodline** **0845 988 1188**.

## **Where warnings are issued**

Flood warnings are broadcast on many local TV and radio stations during weather and traffic bulletins.

Warnings will be issued on:

## How warnings are issued

When there is a risk of flooding the Agency issues warnings through the media on TV and radio weather bulletins.

In areas of particular risk the Agency can send a warning message direct to people at home or at work by telephone, fax or pager using our Automatic Voice Messaging (AVM) system. We can program the system to send warning messages automatically to a list of contact numbers and we can send several hundred messages simultaneously.

All types of telephone can receive these messages, including mobile phones. If the call isn't answered the system will try twice more. The AVM system can give advance warning of flooding, day and night; we aim to give two hours notice of flooding to enable people to take the necessary action to protect themselves and their properties. Sirens and flood warden schemes may also operate in some areas. *(See centre pages for details of the service in your area.)*

More information is contained in Local Flood Warning Plans which you can view at Environment Agency and local authority offices.

Our **Floodline 0845 988 1188** service also carries recorded information on flood warnings in force anywhere in England and Wales. The information is regularly updated and is available 24 hours a day. Using a quickdial number gives you faster access to information in your area.

# What to do before, during and after a flood

## Be prepared

In a flood, you may find you're without lighting, heating or a telephone line.

- the following simple actions will help you to be prepared. The time to think about it is now – don't wait until it happens. The better prepared you are, the better you'll cope if it happens to you and your family
- make sure you have adequate insurance. Flood damage is included in most buildings insurance policies, but do check your home and contents are covered
- make up a flood kit – including key personal documents, torch, battery or wind-up radio, rubber gloves, wellingtons, waterproof clothing, first aid kit and blankets
- keep details of your insurance policy and the emergency contact number somewhere safe – preferably as part of your flood kit
- get into the habit of storing valuable or sentimental items upstairs or in a high place
- buy some sandbags or floodboards to block doorways and airbricks. Tips on how to lay sandbags effectively are included in the Agency's new flood proofing guide available on our website [www.environment-agency.gov.uk](http://www.environment-agency.gov.uk) or from **Floodline 0845 988 1188**

- make sure you know where to turn off your gas and electricity
- keep this Flood Directory to hand - it contains a list of the numbers you may need – your local council, the emergency services and your Floodline Quickdial number

## What to do when you hear a warning

- listen out for warnings on radio and TV, and phone **Floodline 0845 988 1188** for more information
- move pets, vehicles, valuables, and other items to safety
- alert your neighbours, particularly the elderly
- put sandbags or flood boards in place – but make sure your property is ventilated
- be ready to turn off gas and electricity (get help if needed)
- co-operate with emergency services and local authorities – you may be evacuated to rest centres
- do as much as you can in daylight. Doing anything in the dark will be a lot harder, especially if the electricity fails

# Stay safe in a flood

## **Beware of flood hazards**

- floods can kill. Don't try to walk or drive through floodwater – six inches of fast flowing water can knock you over and two feet of water will float your car
- manhole covers may have come off and there may be other hazards you can't see
- never try to swim through fast flowing water – you may get swept away or be struck by an object in the water
- don't walk on sea defences, riverbanks or cross river bridges – they may collapse in extreme situations or you may be swept off by large waves. Beware of stones and pebbles being thrown up by waves
- avoid contact with floodwater – it may be contaminated with sewage
- move your family and pets upstairs or to higher ground. If the flooding is severe the authorities may move you to temporary accommodation
- switch off water, gas and electricity supplies at the first sign of flooding to your property

# Cleaning up

## If you've been flooded

- call your insurance company's (24 hour) Emergency Helpline as soon as possible. They will be able to provide information on dealing with your claim, and assistance in getting things back to normal
- find out where you can get help to clear up. Check with your local authority or health authority in the first instance, or look under 'Flood Damage' in Yellow Pages for suppliers of cleaning materials or equipment to dry out your property
- open doors and windows to ventilate the house, but take care to ensure your house and valuables are secure. It takes a house brick about an inch per month to dry out
- contact your gas, electricity and water company. Have your power supplies checked before you turn them back on. Wash taps and run them for a few minutes before use
- throw away food which may have been in contact with floodwater – it could be contaminated. Contact your local authority Environmental Health department for advice
- beware of bogus traders. Always check references and if possible get recommendations. Contact your local authority Trading Standards department for advice

A guide to repairing and restoring flood damaged property is available on the Agency's web site [www.environment-agency.gov.uk](http://www.environment-agency.gov.uk) or from **Floodline 0845 988 9188**. Other useful websites include The Association of British Insurers (ABI) [www.abi.org.uk](http://www.abi.org.uk) and The Construction Industries Research & Information Association (CIRIA) [www.ciria.org.uk/flood](http://www.ciria.org.uk/flood)

In recent years the UK has witnessed several major flood events and scientists predict that climate change could lead to more frequent flooding in future.

So it's important to be aware and prepared.

Taking the simple advice contained in your Flood Directory can help you and your family cope with a flood - and could save your life.

**Flooding. You can't prevent it. You can prepare for it.**
