NATIONAL RIVERS AUTHORITY - ANGLIAN REGION

1994/95 REGIONAL PLAN

- Driest
- Lowest
- Highest Population Growth

FORWARD

REGIONAL PLAN 1994/95

This plan describes the way in which we intend to deploy all our resources in an effective and efficient manner to achieve real improvements in the water environment in 1994/95. The detailed Management Action Plan setting specific targets will be derived from this document.

I commend ownership of this plan to RMT and their reports and hope that it will help you all understand your contribution to the success of the NRA.

SECTION 1

RGM'S EXECUTIVE SUMMARY

RGM'S EXECUTIVE SUMMARY

PROGRESS 1993/94

The Region's progress against its 1993/4 Plan has been successful. The majority of operational targets will be met and there have been a number of significant achievements. Revised manpower control numbers will be achieved by year end, although the Region continues to have a higher workload than its geographic area represents in the national context on a number of activities. Efficiency savings have been made totalling £1.4M.

Achievements include restructuring which was implemented by 1st July 1993 and the Market Testing Programme which has been progressed on target. Other accomplishments encompass the introduction of an Open Learning Library, the operation of Team Building Workshops, a reduction in debtors, the introduction of Service Level Agreements, the installation of a new Regional Telemetry System and a Private Mobile Radio network. Four Catchment Management Plans were brought to their Final Report stage with a further five currently in progress. Restructuring included a new Regional Management Team from 1st April 1993, Area based multifunctional management from 1st July 1993 and Client/Provider sections set up in Flood Defence Operations and Engineering Services.

Core function achievements have included the following:

- Regional Water Resources Strategy launched April 1993
- Implementing 3 ALF Schemes
- Negotiation of AMP2 Proposals
- Best Ever STW Discharge Compliance
- Improvement in River Quality
- Pilot I.B.U. for Flood Defence Operations
- Colne Barrier completed
- Response to Flood Emergencies Feb, Oct, Nov 1993 and Jan 1994
- Planned Fisheries Surveys completed
- Increase in collaboration on Recreation Projects
- Development in Conservation input to CMPs
- Completion of River Nene Navigation Landing Stages

Particular problems have arisen in compliance with the Water Resources Enforcement Programme PIN where lower priority applies with the end of the drought, and with responding to complaints and MP letters within the 5 days target to ensure comprehensive responses. Disappointments have been the delay in the Lincolnshire Beach Recharge Project, closure of the Peterborough Chemistry Laboratory, progress on the Happisburgh to Winterton Sea Defences and a £1M shortfall in Water Resources Capital expenditure.

KEY ISSUES AND PRIORITIES

- Providing more for less through efficiency savings, and inter-regional sharing
- Effective Service Delivery
- Managing changes initiated through Market Testing, IBU's and manpower reductions
- Dealing with the impact of development in a Region of highest growth
- Further rationalising of the respective roles of Regional and Area staff
- Promoting and funding a number of major projects
- Meeting Customer Care and environmental targets
- Meeting Catchment Management Plan programme for production and actions
- Adding value, not overhead from Support Services

Key issues in the core functions will be:

Flood Defence

- Financing Strategy/Reduction of LFDC Balances
- Capital Needs £41M per year against Funding Policy of £38M per year
- Achievement of Capital Programme including:- Commencement of Lincshore, completion of first breakwater at Happisburgh and initiation of bank strengthening on Broadland
- Definition of Standards of Service
- Workforce "Noble" Numbers Review

Water Resources

- Integration of Regional Strategy into National Strategy
- Compliance with Enforcement Policy
- Maintaining Operation of Water Transfer Schemes
- Alleviating Low Flow Problems

Water Ouality

- Maintaining Improved Quality of Discharges
- Control of Diffuse Pollution by Nutrients and Pesticides
- Introduction of SWQO's
- High proportion of Eutrophic Sensitive Areas and Nitrate Sensitive Zones
- Solutions to Potential Groundwater Pollution
- Implementation of Groundwater Protection Policy

FRCN.

- Introduction of a Net Limitation Order*
- Review of Fisheries Programme
- Further use of NRA Owned Land for Recreation
- Restoration and Improvements in Conservation through other Core Activities
- Implementation of Conservation Classification Standards into CMP's
- Development of Regional Navigation Strategy
- Harmonisation of Charges with other Navigation Authorities

[•] Included as a priority on the basis of additional funding being made available from Head Office.

USE OF RESOURCES

The allocations for financing core functions are those advised by Head Office. These include income and expenditure for 1994/95 and 1995/96. The previously suggested indicative allocations were revised to include further savings identified by the Region at the Bilateral meeting, plus an additional £1M for Flood Defence Capital. Allocations have been divided as shown below:

FUNCTION	TOTAL	1994/95 £K REVENUE	1994/95 £K CAPITAL					
			CORE FUNCTION	MULTI-FUNCTIONAL				
Water Quality	9401	8460	385	556				
Fisheries	1721	1621	41	59				
Recreation	243	217	16	10				
Conservation	338	296	32	10				
Navigation	779	600	. 153	26				
Sub Total	12482	11194	627	661				
Water Resources	10319	7569	1614	1136				
Sub Total DoE	22801	18763	2241	1797				
Flood Defence	58116	19991	36473	1652				
TOTAL	80917	38754	38714	3449				

The balance of capital expenditure will move to core function projects after 1994/95 once large multi-functional projects such as Regional Telemetry and Trunked Radio are completed. The following initiatives are being taken by the Region:

- Reduction in over heads eg
- Scale reductions in line with reduced organisation following Market Testing
- Service Level Agreements focusing on service requirements and costs
- Inter-Regional sharing of resources
- Redistribution of staff eg from Region to Areas
- Transfer of 3 staff following internal review of Water Resources function
- Reduction in uncomplemented staff at Region to increase the numbers in Areas
- Reappraisal of client side requirements
- Income generation through: eg
- External Bureau Contract (Computer Services) £280K
- Legal Services (£50K)
- Property (£380K)

SECTION 2

EFFECTIVE SERVICE DELIVERY

EFFECTIVE SERVICE DELIVERY

REGIONAL ORGANISATION

- New RMT from 1st April 1993
- New staff structure with Area based multifunctional management from 1st July 1993
- Client/Provider sections set up in:

 Flood Defence Operations from 1st July 1993

 Engineering Services from 1st April 1993
- Laboratory staff re-deployed following closure of Peterborough Chemistry Laboratory at end of December 1993 as part of National rationalisation
- Function responsibility for Flood Defence under Regional Technical Manager from 1st January 1994 with loss of RFDM post
- Capital Planning, Emergency Planning (including 24 hr Regional Communications Centre)
 Transport and Plant (Administration and Procurement) under Regional Business Services
 Manager from 1st January 1994
- Transfer of three Water Resources Regional staff to Areas in 1994/5
- Responsibility for IBU staff, manual employees and craftsmen to be transferred from Area Managers to Regional Contracts Manager from 1 April 1994

ACCOMMODATION AND INFRASTRUCTURE

				-
YEAR	LOCATION	ТҮРЕ	PROPOSAL	ESTIMATED COST/ (INCOME) (£k)
1994/95	Lincoln	Office	Repairs	30
1994/95	Peterborough (Kingfisher House)	Office	Kitchen Extension	20
1994/95	Kings Lynn	Depot	Drainage	28
1994/95	Kings Lynn	Office	Shower	8
1995/96	Kings Lynn	Office	Repairs	20
1995/96	Spalding	Office	Extension	75
1995/96	Norwich	Office	New to replace leased office	1425
1995/96	Peterborough (Aqua House)	Office	Sell	(1000)

MARKET TESTING AND THE ENVIRONMENT AGENCY

Market Testing

- Service Level Agreements established during 1993/94 for all activities in the 1994/95 Market Testing Programme
- Costs identified for all activities, including overhead and Support Service charge; some through Activity Time Recording
- Business Plans prepared for all functions, identifying use of resources and outputs for 1994/95
- Process of baseline reviews commenced, with Regions mainframe computer operation now complete
- Internal efficiency review undertaken for Hydrometry, with activity costs centre identifying expenditure to detailed task level
- Monitoring processes established for support services which identify scale reductions resulting from Market Testing initiatives
- Overhead cost reductions being pursued through efficiency reviews
- Positive attitude to Market Testing being engendered in staff through development of Value for Money culture and communication to ensure awareness of programme developments

Environment Agency

- National dinner held with WRA's followed up by Regional meetings with Eastern Waste Regulation Group in October 1993 and with East Midlands WR Group in December.

 Anglian joined Southern and Thames Regions in a joint meeting with SEWRAC in January 1994
- Meetings established links at Regional Management Team and Regional Committee Chairman level with Councillors, Directors and Senior Officers of WRA's. Issues relating to the formation of ENVAGE were discussed and a positive start made to future liaison and co-operation
- Informal discussions held between Regional General Manager and Regional Manager for HMIP (Anglian Region)
- RGM has invited WRA members to attend future RRAC meetings to help develop liaison
- Several Meetings already held between NRA staff and officers of WRA's and HMIP, at both Regional and Area levels, to discuss policy and technical issues
- Awareness training in HMIP/WRA activities carried out internally for NRA staff

SECTION 3

TOP PRIORITY CORE FUNCTION DELIVERY

TOP PRIORITY CORE FUNCTION TARGETS FUNCTIONAL PRIORITIES

Multi-functional

- Prepare for the Environment Agency
- Manage for the Region the implementation of WAMS
- Continue to sponsor and support R&D so that it meets the Region's requirements for efficiency and improving the environment
- Develop strategies for the Humber and the Wash
- Integrate the approach to Quality and Quantity in groundwater
- Preparation of business cases to be in a position ready to obtain extra Grant in Aid, if available, to meet capital investment needs

Water Quality

- Protect water quality by maintaining recently improved quality of discharges
- Plan and justify any further improvements that are needed in the quality of discharges
- Evaluate the need and scope to improve water quality by the control of diffuse pollution by nutrients and pesticides
- Establish, with a view to future strategy, the benefits of recent schemes to remove phosphorus from large discharges of sewage effluent
- Protect the Environment whilst managing the growth of work under Integrated Pollution Control
- Maintain the all-round pressure of persuasion and enforcement which has helped produce a strong improvement in water quality
- Through the introduction of Statutory Water Quality Objectives, consolidate and justify our efforts to maintain the quality of the Environment
- Protect the Environment by responding quickly and thoroughly to pollution incidents
- Protect the Environment by reducing the number and impact of pollution incidents through Pollution Prevention Visits under the Groundwater Protection Policy, and visits to farms and industrial sites identified in Catchment Management Plans
- Protect the Environment by reducing the number and impact of pollution incidents through our contribution to Integrated Pollution Control
- Protect the quality of groundwaters and water supplies by introducing further Groundwater Protection Zones under the Groundwater Protection Policy and completing formal inspections of the Zones around the major sources of Public Water Supply

- Plan the measures needed to clean-up or mitigate particular cases of groundwater pollution
- Provide input to national policy and national projects; establish the National Centre on Toxic and Persistent Substances
- Redevelop our systems for data management and the audit of water quality following the re-direction of our analytical work to the National Laboratory Service, and so contribute to improved efficiency
- Achieve our monitoring programmes and manage our data in order to: preserve our ability to take good and quick decisions; achieve our statutory duties; meet our reporting deadlines; satisfy our commitments for Directives and International Agreements; and complete the monitoring for the 1995 Surveys of Biology, Chemistry and Nutrients
- Continue to seek improvements in efficiency through initiatives that audit the performance of the Water Quality function
- Continue our input into policy for the implementation of new Directives

Flood Defence

- Achieve a £36M capital expenditure programme for 1994/95
- Seek to increase capital expenditure in future years with needs of £41M/year against a funding policy of £38M/year
- Reduce LFDC balances
- Obtain MAFF agreement for licence to dredge sea bed material and commence the Lincolnshire Beach Recharge project
- Complete the first reef scheme at Happisburgh Begin bank strengthening in Broadland
- Complete the establishment of standards of service, and progress liaison with local planning authorities to comply with the Memorandum of Understanding for the provision of Section 105 survey information on flood risk and protection standards
- Propose Coastal Management National Centre
- Promote shared risk by Contractors
- Review workforce "Noble" numbers
- Further develop the client role in Flood Defence Operations, including rationalisation on a catchment basis
- Progress the Lower Witham Investigation, following the October 1993 floods
- Develop plans jointly with local authorities and the Port of Boston on the feasibility of a Boston Sea Lock

Water Resources

- Complete investigations for River Great Ouse Management Plan (ROMP)
- Integrate the Regional Water Resources Strategy with National Strategy
- Provide input into the detailed planning for the preferred reservoir site
- Compliance with Water Resource Enforcement PIN requirements
- Maintain the operation of water transfer schemes and develop the client role
- Achieve a £1.1M capital expenditure programme including further improvements to Ely Ouse Essex transfer scheme and refurbishment of Trent Witham Ancholme transfer scheme
- Alleviation of Low Flow problems including completion of the River Slea project and investigations to determine the preferred solution for Redgrave and Lopham Fen
- Meet targets on abstraction licence determinations
- Prepare for Market Testing of Hydrometry

Fisheries

- Introduction of a Net Limitation Order and implementation of its enforcement
- Continuing promotion of the Regional Fisheries Laboratory as a National Centre and encouraging its use by other Regions
- Review of fisheries survey programme

Recreation

- Identification of Real World improvements
- Further use of NRA owned land for recreation

Conservation

- Restoration and improvements through other core function activities
- Promotion of further collaborative projects
- Introduction of developed method of conservation input to catchment management planning
- Improved input to responses to development planning proposals and to flood defence works

Navigation

- Development of a Regional Strategy, including customer liaison
- Progress on harmonisation of charges with other navigation authorities

AREA TARGETS - "MAKE A DIFFERENCE" SITES

Northern Area

1. Helpston

Investigations into groundwater pollution at Helpston will reach the stage at which the evaluation of resolutions can be concluded and a final recommendation made to the Board. Implementation of any solution will require close liaison with both Cambridgeshire County Council and Peterborough City Council, along with Anglian Water Services plc who are the major abstractor in the affected area.

2. Lincshore

The proposed recharging of the Lincolnshire Coastline is considered both urgent and essential for the protection of life and property from coastal flooding. Commencement of work in 1994 is dependent on an early decision from MAFF on the NRA's application to extract sand from the Race Bank in the Wash. If this decision is not forthcoming, a major one year investigation into the environmental survey of the Wash crab fishery will be completed, but only minor schemes will be possible before 1995 to afford the urgent basic protection that is warranted. The approved budget for the project is £50M over the next four years.

3. River Nene Structures

An ongoing survey programme to improve River Nene flow control and navigation structures will continue during 1994/5. Work will include the establishment of control structures at Cotterstock, Etton and Stanwick, the electrification of two locks and the improvement of five lock foot bridges. The overall programme will allow greater control of river flows and build on the 1993/4 programme by providing major improvements in navigation ease and safety. Further embellishment of the River Nene will be afforded by improvement of flood defences through the town of Northampton.

4. Long Eau Washland Project

In 1993/4 a collaborative project to return 20 acres of riverside arable land to wet grassland/washland was instigated between the NRA, Countryside Commission, Farming and Wildlife Advisory Group and a local landowner. The scheme is scheduled to involve embanking the area and linking it to the Long Eau. This will allow combined flood storage of 150,000m³, whilst also providing development of rare and threatened grassland habitat for wildfowl. Completion of the project will see production of a Great Eau/Long Eau restoration report; this will extend project principles to the catchment, providing a practical approach to restoration, increasing wildlife and flood defence assets.

5. River Slea

Alleviation of low flows in the River Slea will be implemented in 1994/5 via acquisition of the proposed borehole site for flow supplementation. The scheme will represent important improvements in river appearance around the Sleaford area.

AREA TARGETS - "MAKE A DIFFERENCE" SITES

Central Area

1. South Cambs

To establish the monitoring and estimation of rises in groundwater levels in the Lower Greensand confined aquifer. This information is to be made available to District Councils, Water Companies and landowners.

2. Bedford

The construction of a Southern by-pass for Bedford is currently at the planning stage and at present, threatens to be charted so that the route will cut though a minor aquifer. Planning Liaison influence is to be used to negotiate special considerations in the construction which will be aimed at avoiding the derogation of other users, and the artesian effects that would undoubtedly cause highway flooding and pollution. Road alignment also crosses the River Great Ouse floodplain which will require close monitoring to ensure that careful attention is paid to sizing and positioning of main viaduct spans and flood arches.

3. Sawston

Groundwater remediation works are to be implemented during 1994/5. Pollution of the groundwater has occurred more recently and at more shallow depths than the pollution which has been subject to a House of Lords ruling in the case of Cambridge Water Company v Eastern Counties Leather. Costs of the remediation works associated with this latest pollution are being sought from Eastern Counties Leather. Discussions are already underway to reach an agreement between the company and the NRA. The works will ensure that the pollution does not seep to lower depths and cause a more serious and expensive problem to resolve. The NRA will continue to monitor the situation via observation boreholes.

4. River Cam Catchment

Fisheries/conservation enhancement of degraded in-stream habitat as identified in the Catchment Management Plan is scheduled. Work is proposed to Bourn Brook to recreate river habitat and wet grassland. Co-operation with landowners is planned to meet the requirements of the Countryside Stewardship Scheme.

5. Kings Lvnn

The completion of tidal defences to Fisher Fleet is scheduled which will subsequently offer protection from North Sea Flooding for the town of Kings Lynn. Extensive consultations with Associated British Ports and local fishermen will be required to satisfy adjoining commercial interests.

AREA TARGETS - "MAKE A DIFFERENCE" SITES

Eastern Area

1. Happisburgh to Winterton Sea Defences

A 16km length of coastline between Happisburgh and Winterton which protects 6000 hectares of residential, agricultural, conservation and recreation land, is subject to beach and sand dune loss. This severely threatens the integrity of the natural and man-made defences. During 1994, four shore-parallel reefs of imported large rock are to be constructed at a cost of £6.5 million to remove wave energy and allow stability. In addition to this, new beach and dune formation will further reinforce the existing defences. An extra 12 reefs are planned for subsequent years.

2. Redgrave and Lopham Fen SSSI

This is a wetland SSSI and RAMSAR site which has been progressively drying out. As part of the identified solution, it has been recommended that abstraction from a nearby Public Water Supply source should cease. The target for 1994/5 will be to locate, drill and license a replacement PWS abstraction away from the fen.

3. Phosphorus Removal - Broadland Sewage Treatment Plants

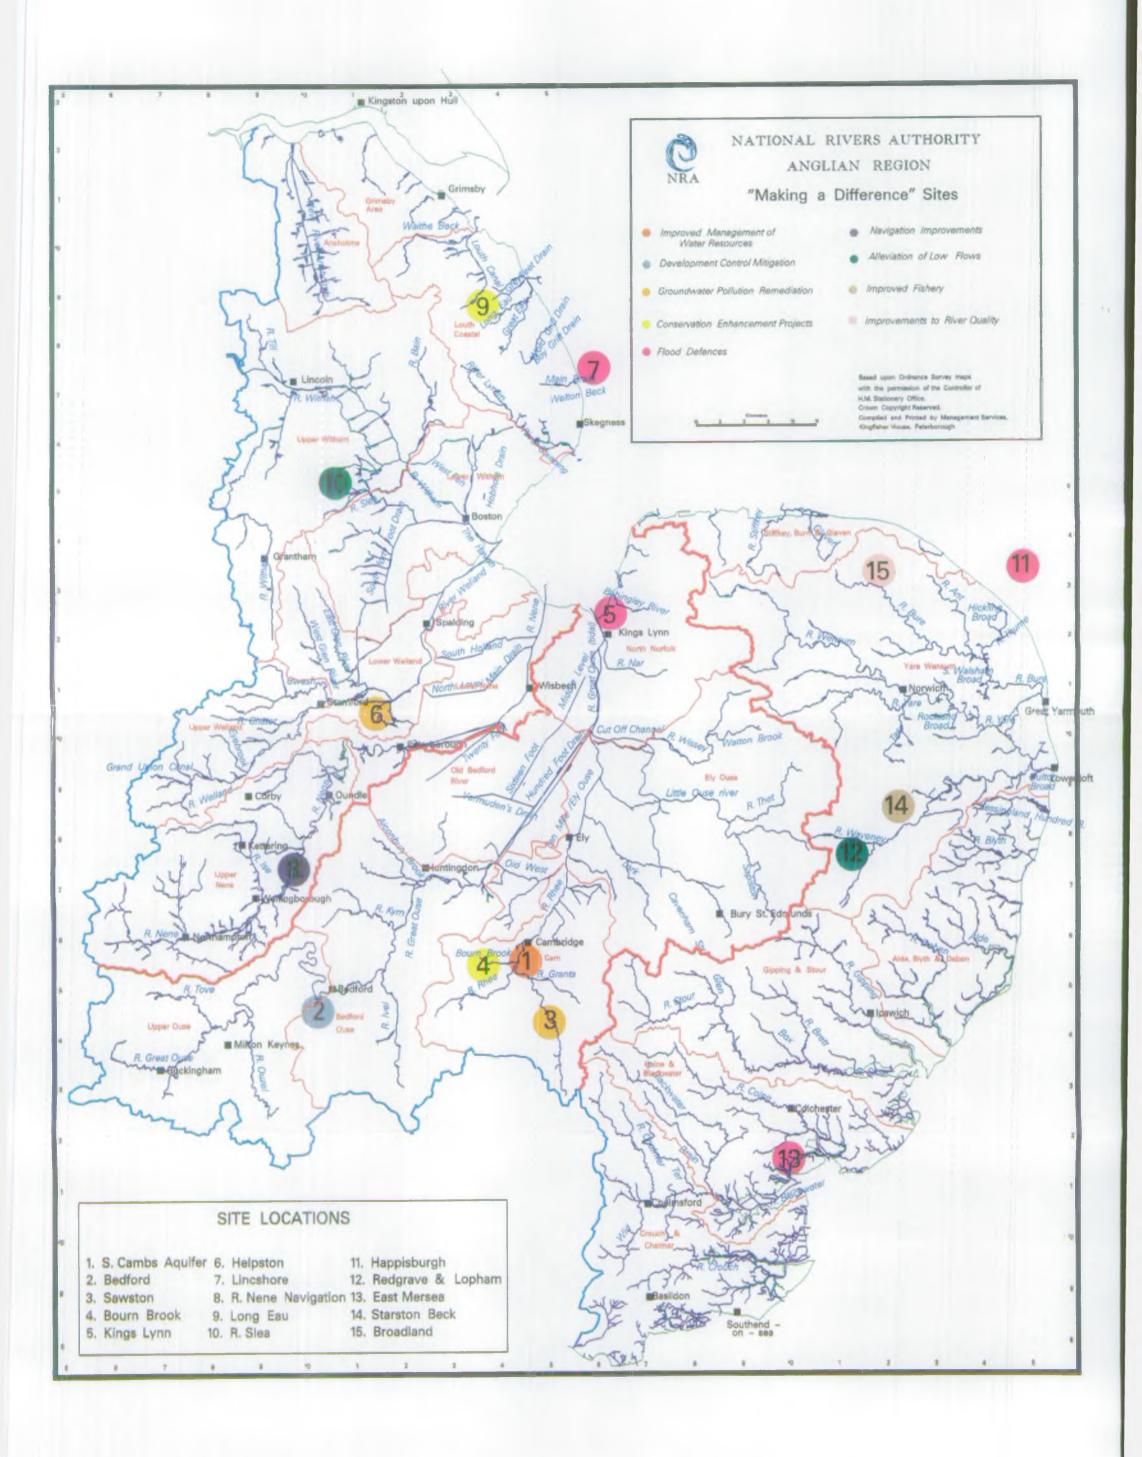

A major objective will be to ensure more effective controls of phosphorus discharges to the Rivers Ant and Bure, thereby improving water quality in Broadland.

4. Rewsalls Sea Wall, East Mersea - Managed Retreat

Rewsalls sea wall stretches for 1.2km on the north shore of the Blackwater Estuary in Essex and protects a grazing marsh which forms a natural bay of 45 hectares. As a result of a reappraisal of these defences in relation to our medium term investment requirements, a managed retreat scheme estimated at £430K is to be undertaken during 1994; this will result in the creation of a valuable salt marsh habitat and a projected saving of £100K per year in capital and maintenance expenditure. The overall project will provide a 5-year pay back and good value for money.

5. Fisheries Restoration and Enhancement

Following the fish mortalities which resulted as a consequence of pollution during 1993, a project to restock and improve the habitat of Starston Beck is planned.

CATCHMENT MANAGEMENT PLANS

CATCHMENT	START DATE	DATE TO RRAC	CONSULTATION STARTS	FINAL VERSION

SECTION 4

EFFICIENT SERVICES

EFFICIENT SERVICES

INTER-REGIONAL SHARING

Regional Managers in Anglian and Severn Trent are co-operating on a Joint Efficiency Initiative. estimated savings are in the order of £150K:

FUNCTION	PROPOSED CO-OPERATION
LEGAL	Insurance Officers in both Regions are to develop best practices
ESTATES	Estates function will be managed by one person reporting to both RBSM's; this will enable a more flexible use of resources
FINANCE	A study is being carried out on the cost benefit of Severn Trent payroll being processed in Anglian. This is independent of IAS development. Implementation would not be before 1.4.95.
ADMINISTRATION	Arrangements have been made for Severn Trent to use the large scale photocopying facilities at Anglian
PUBLIC RELATIONS	i) Both Regions are to lose their senior PR Officers in the near future; discussions will take place involving the Director of Public Affairs as to how the service can be provided across both Regions ii) Arrangement has been made for Severn Trent to use Anglian's PR trailer. This will eliminate the need for Severn Trent to acquire a similar trailer which would have cost £25K iii) Feasibility of providing joint out-of-hours cover will be discussed
INFORMATION SYSTEMS	Areas to be identified for joint support arrangements; discussions to take place as to whether these plans can be extended to provide a help desk for both Regions from Anglian
EMERGENCY PLANNING	Arrangements have been made for i) Joint operation of Lone Worker Alarm System ii) Automatic re-routing for switchboard failure iii) Single reporting point for each County Fire Brigade whose area of operation covers both Regions iv) Joint Humber Estuary Pollution Plan (co-development with Northumbria/Yorkshire Region)
TRANSPORT AND PLANT	Plans to be produced whereby Transport and Plant will be managed for both Regions by Severn Trent, with the Transport Manager reporting to both RBSM's. Savings are estimated at £50K
PROCUREMENT	To assist Anglian establish its Procurement section, consideration is being given as to whether Anglian can take certain Severn Trent contracts off the shelf to save having to develop their own. Severn Trent have already carried out work in Anglian on an analysis of likely opportunities for Regional contracts
FISH PRODUCTION	Fish production facilities have been closed in Anglian and are now carried out by Severn Trent. Estimated savings of £60K for 1994/5
EMERGENCY WORKFORCE	Arrangements are in hand to transfer resources across Regional boundaries in the event of a serious event

Other possibilities are being sought and reciprocal arrangements have been made to share information about initiatives in other Regions.

IS CORPORATE PLAN

Notes

General

- 1. Staff costs include NI, Superannuation, expenses and Departmental Recharges.
- 2, National Development staff are included in "Other" costs.
- 3. Telemetry, Private Mobile Radio and Flood Defence Modelling capital schemes are included.
- 4. Staff allocations are based upon best estimates.
- 5. Weather Radar costs are no longer within I.S Budgets.
- 6. Regional income (£250k) has been excluded from the return.
- 7, Brackets indicate shortfall in regional budgets.

1994/1995

Objectives

- More for less. Staff reduction from 34 FTE's to 28 FTE's.
- Continue efficiency reviews.
- . Complete ARTS and PMR capital projects.
- Progress Joint Working arrangements with other regions.
- Involvement in National Development Projects.
- Full Migration to national NALD system, and progress WAMS, IAS and PS migration.

1995/1996

Objectives

- General transfer of resources from ongoing support to national migration and development tasks.
- Reduced capital expenditure.
 - Full migration to IAS, PS, FDMS, Incidents and Prosecutions and application systems.

PUBLICATION PLANS FOR 1994/95

Publications planned for 1994/95 will be dominated by the production of 6 Catchment Management Plans. It is also proposed to produce several more river fact files, which are useful for responding to enquiries from students, as well as producing publications that may be required by other departments.

The Regional newsletter "Streamline" will continue to be published monthly (with the exception of August).

Publication to be Produced	<u>Estimated</u> Expenditure
Bedford Ouse Catchment - Final Plan	£ 1,100
Upper Nene Catchment - Final Plan	£ 1,100
Colne/Blackwater Catchment Management Plan summary document	£ 2,800
Colne/Blackwater Catchment - Final Plan	£ 1,100
Grimsby Catchment Management Plan summary document	£ 2,800
Grimsby Catchment - Final Plan	£ 1,100
North Norfolk Rivers Catchment Management Plan summary document	£ 2,800
Lower Witham Catchment Management Pan summary document	£ 2,800
Consultation Report covers for CMP's	£ 1,800
New Corporate Brochure	£ 1,500
Essex Area Fishing Guide	£ 1,800
7 River Fact File leaflets	£ 6,500
Updates and reprints of existing publications	£10,000
Streamline	£ 4,000
Production of publications as required by other departments	£10,000
TOTAL	£51.200

	TOTAL	1311	1181	1097	1097	

Notes to MP1:

- 1. The TOTAL of this table should equal the TOTAL on tables MP2 and MP3, and equate to the control totals advised to your RGM on 14th February 1994.
- 2. 'Support Staff' who actually work to clearly defined functions / services should be placed directly within these functions / services (on % time basis if they work for more than one function / service).
- 3. 'Administration' should include the following staff functions:
 - Regional General Manager and personal assistant(s);
 - Corporate / Business Planning;
 - Procurement
 - Board and Committee Services;
 - Information and Library Services;
 - Office / Management Services;
 - Central clerical / office services, to include:
 - Central WP / typing pools;
 - Reprographics;
 - Receptionists, telephonists, postroom;
 - Security and caretakers.
- 4. This table should not include posts which are part of any National Centre or Service.
- 5. 'Others' should **only include** posts which cannot be allocated to any of the listed categories. Wherever possible, you **should** allocate multifunctional posts on % time basis to those functions / services to which the post contributes.
